Posi-Tracer|GX6 harnesses

According to ELD regulations, vehicle status information should come directly from the onboard computer. The simplest way is a direct connection through the diagnostic port, for which there are many choices for harnesses.

Check below to match your connector, or if you need help or just want to be sure you’ve got the right harness for your vehicle, call us

### Specifications

**OBDII** - 16-pin diagnostic port mostly common to all regular vehicles, passenger buses and light duty trucks

**JBUS 6-pin** (aka J1708, 6-pin Deutsch-connector) - common connector for trucks made before 1998

**JBUS 9-pin** (Universal) - common connector for all recently made heavy-duty and medium-duty vehicles
